

## Website Activity

This is an assessment task. You are to carry out an investigation of a website and answer the questions below using a word processor. When you are finished you are to email your report to your teacher/tutor.

1. Go to <http://www.dhmo.org> and try to determine whether the information is reliable.
2. What is the purpose of the site?
3. Is dihydrogen monoxide a real substance? Do you think it should be banned?
4. Can you find other websites that support the claims made by dhmo.org?
